CANADIAN SPIRIT RESOURCES TO COMMENCE FARRELL CREEK OPERATIONS

Calgary, AB June 9, 2005 - Canadian Spirit Resources Inc. (“CSRI” or the “Company”) (SPI-TSX Venture) announces that it has been advised that road bans in the Farrell Creek area will be lifted effective Monday, June 13, 2005. This will enable the Company to commence its summer work program which will begin with several days of gravelling to allow uninterrupted access to Company roads and leases.

Operations that will proceed simultaneously as soon as practical thereafter include:

- a) stimulating and production testing a conventional tight gas sand in its second test hole;
- b) a staged stimulation and production testing of the Gething formation coals and interbedded sands in its third test hole; and
- c) spudding of a fourth test hole dedicated to gathering data on shale gas potential in the Farrell Creek area.

Canadian Spirit Resources Inc. is a natural resources company focusing on the exploration and development of opportunities in the natural gas from coal (“NGC”, also referred to as coalbed methane or “CBM”) sector of the energy industry.

On behalf of the Board of Directors,
Canadian Spirit Resources Inc.

“Phil Geiger”

Phillip D.C. Geiger, President & COO
